Re: Final Source Control Decision  
Brazil Motors & Controls, Inc., Portland, Oregon  
ECSI #1026  
March 29, 2016

Dear Mr. McClincy:

The United States Environmental Protection Agency (EPA) has completed its review of the Final Source Control Decision for Brazil Motors & Controls, Inc.

Based on the information provided, EPA agrees that Source Control Measures at this upland site are reducing the potential for recontamination of the Willamette River within the Portland Harbor Superfund Site (PHSS). Any stormwater runoff from this upland site would discharge through City Outfall 19 to a Sediment Management Area (SMA) within the Willamette River. Because SMAs may require future in-water cleanup actions at the PHSS, EPA may require further source control actions under its CERCLA authorities to ensure contaminants from this upland site do not contribute to risk or recontamination of PHSS remedies.

Please contact me at (206) 553-1970 or [demaria.eva@epa.gov](mailto:demaria.eva@epa.gov) if you have any questions.

Sincerely,

A handwritten signature in black ink, appearing to read "Eva DeMaria", is positioned above the printed name.

Eva DeMaria  
Remedial Project Manager
